Leading the Way in Innovation

**FASTER**  
TREATMENTS.

**LARGER**  
AREAS.

**DEEPER**  
STRUCTURES.

The new LightForce® 40W XLi and 25W XPi with Empower IQ™ Delivery System combine **power** and **intelligence** to bring innovation to the laser therapy treatment room. Designed for busiest practices who desire the fastest, most effective treatment solution, the LightForce® XLi and XPi bring **science** and **technology** together to treat deeper structures more efficiently, making it easier to impact **pain**.

# POWER.

The LightForce® 40W XLi (pictured) and 25W XPi are our most powerful lasers ever. The increased power directly impacts the time needed to apply a therapeutic dose of light energy, allowing clinicians to decrease the time required to treat effectively. The higher power equips clinicians to treat **deeper and faster** while covering **more tissue area in less time**.

# INTELLIGENCE.

Powered by the next level of LightForce® Influence® Technology, the LightForce® XLi and XPi were innovated with the clinician in mind. In order to achieve effective treatments and improve dosing accuracy, the lasers assess the operator's speed and give **real-time visual and sensory feedback**. The in depth protocol settings provide recommended parameters on treatment heads and power levels to aid in technician confidence and reduced learning time.

Speed Too Fast

Speed Too Slow

# DELIVERY.

The **new Empower IQ™ Delivery System** changes the game in laser therapy emission. Built to be user friendly and responsive, Empower IQ™ is the new generation of delivery technology.

**Fiber.** Ultra-premium workmanship and next level durability. Extra-long for user convenience.

**Handpiece.** Built-in dosing feedback technology with embedded finger switch and indicator lights. Ergonomic styling for operator comfort.

**Quick Disconnect Heads.** Quick release and change-out treatment heads for better ease of use. Smart system for sensing appropriate applicators, power associated, and sweep speeds. New XL Cone and XL Rolling Pin are designed with generous spot size for treating larger surface areas for contact and non contact applications. LightForce® patented massage ball for on-contact treatment.

## THE WHY.

The number one question from laser therapy users is, “How do I know if I’m treating correctly?” Clinicians were asking for in-use feedback on dosing accuracy, and LightForce’s team of innovators went to work. The result? A new delivery system with the IQ that takes the guess work out of treating, providing **more accurate treatments** for clinicians and **better outcomes** for patients.

\*Only available with the 25W LightForce XPi

\*\*Only available with the 40W LightForce XLi

# iSeries

Leading the Way in Innovation

 Up to: **40W** of therapeutic power

## Product Specifications

### LightForce® XLi

Laser Type: Class IV, Solid State

Laser Wavelength: 980/810 nm

Laser Power: 0.5W – **40W**

Operating Modes: CW or Pulsed

Aiming Beam: 650 nm, 4.5 mW

Dimensions: 17" x 10.5" x 11"

43 cm x 28 cm x 26 cm

Weight: 19.6 lbs. | 9 kg

 Up to: **25W** of therapeutic power

## Product Specifications

### LightForce® XPi

Laser Type: Class IV, Solid State

Laser Wavelength: 980/810 nm

Laser Power: 0.5W – **25W**

Operating Modes: CW or Pulsed

Aiming Beam: 650 nm, 4.5 mW

Dimensions: 17" x 10.5" x 11"

43 cm x 28 cm x 26 cm
